PRODUCT DESCRIPTION

Dal Brands experience with ergonomics and seating is evident with the full level of adjustments that ControlMaster™ offers. Every part of this chair is built and tested for purpose.

Sedentary work is widely recognised as a health risk, ControlMaster™ has been designed to promote active working. The responsive forward knee tilt mechanism is positioned to allow reclining without your feet leaving the floor. And a generous sized seat designed to allow you to adopt different postures without restriction from large side bolsters.

The 6 star aluminium base provides additional strength and stability, particularly when fully reclined. Our standard upholstery is either Gabriel Fighter fabric which is a heavy duty commercial fabric with outstanding wear characteristics, or black leather.
