

DAVELL POLYCARBONATE SHELF DIVIDERS

Polycarbonate Shelf Dividers are used to divide and support files, folders or books. They can also be used to sectionalise shelves to allow neat and tidy storage of miscellaneous items.

Australian made from lightweight shatter-resistant polycarbonate these dividers can be bent to an angle of 45° and return to their original shape, unlike steel dividers.

Each divider locks into dual slots that run parallel along each shelf and can be removed or repositioned as required.

Divider Dimensions: 335mm long x 150mm high

Optional File Backstop Rods are also available.

These rods enable files to be located at the front of each shelf.
