DAVELL RFID SWIPE CARD DIGITAL (LF3786)

A simple smart card lock providing codeless access.
The LF3786 RFID lock offers functions for single users (Private Function) and short-term use by multiple users (Public Function).
Manufactured from high strength synthetic metal replacement material, Grivory.

FEATURES

- Smart Card Access
- Private Function ? Single User
- Public Function ? Multiple Users
- Manual Override Key
- Vertical or Horizontal
- Easy to program
- Up to 15,000 Operations from 2 ?AA? Batteries
- Battery Condition Indicator
- Colour: Black
- Dims: 140mmL x 41mmW x 21mmD (27mm at handle)

Private Use Function
Suitable for repeated use by the same users.
The LF3786 supports up to 50 MIFARE smart cards, each individually registered to the lock.
Dedicated and existing MIFARE cards can be used, no need to purchase new smart cards.

Public Use Function
Suitable for short-term use by different users.
Touch a MIFARE smart card to lock the lock, then use the same card to unlock the lock, leaving the lock in the unlocked state for any other compatible cards to be used.

A Master Card can be used to open the lock and delete the current in-use User Card. The lock will return to the unlocked state.

A Technician Card Can be used to open the lock and retain the currently in-use User Card. The lock will return to a locked state.
