

DURALITE FOLDING TABLE

- DuraLite tables exceed stringent tests for leg strength, weight load, and vertical drops onto hard surfaces.
- Replaceable corner covers and greater weight-bearing strength result from exclusive design innovations.
- Rubber bumpers protect tables when stacked and keep tables in place on dollies. High impact covers protect from damage upon impact.
- Strong metal-to-metal attachments provide maximum holding power and ensure screw holes won't strip.
- Legs are easily replaceable.
- Unprecedented, weight bearing strength. DuraLite tables hold a large amount of weight: 907kgs evenly distributed.

PRODUCT DESCRIPTION

Easily carried by one person, DuraLite Folding Tables are perfect for any application that requires repeated set up and pack-down (seminars, catered events and multi-use spaces).

The toughest table on the market

DuraLite folding tables withstand the toughest demands of daily use. Tested to withstand up to 907kg of weight, the unique honeycomb core, aluminum framework, superior materials and innovative design result in a lightweight table that is strong and durable, plus they are GreenGuard certified.

Our DuraLite tables are proudly GreenGuard certified, meaning they are scientifically proven to meet rigorous chemical emissions standards, ensuring that a product or material has low chemical emissions and improves the quality for the air in which it's used.
