

FUNDAMENTALS ADJUSTABLE FOOTREST

This Australian made footrest has a unique design which means that it is easily adaptable for people of all heights. Height is simply adjusted by varying the number of spacer blocks under the footrest.

3 sets of spacer blocks are supplied with the unit. Additional sets of spacer blocks are available separately if you need more height.

The height of a basic unit with one set of blocks is 36mm at the front and 105mm at the rear. Every time you add a set of blocks 17.5mm is added to the height.

The CW2000 also features an anti-static carpet covering which ensures peace of mind.

Height of a basic unit (with one set of blocks): 36mm at the front, 105mm at the rear

Plate size: 460mm x 310mm

SKU: N/A
