

MAYA CHAIR

The Maya Chair is no ordinary plastic chair. It's extraordinary strength is due to the entire chair being one-piece injection moulded thermoplastic, the legs reinforced with glass fibre for even more stability. The plastic is packed with UV stabiliser, so this chair will not fade or go brittle even in the sunniest weather conditions. The Maya Chair has a CATAS Certificate (complies to European commercial standards). Don't get Siesta's Maya Chair confused with other 'Maya' versions on the market, this one is the only one built to last in busy commercial venues, indoor or outdoor.
