PRODUCT DESCRIPTION

WHY SANA 3D TILES?

SANA 3D tiles are amongst the most efficient methods of combating reverberate noise, either planned from the outset as a design feature or retrofit as a cure for any previously unforeseen ‘noise annoyance factor’ - the latter being experienced in most commercial interiors.

The control of reverberate noise in spaces where people work, relax, socialise and learn is of critical importance. ‘Reverberant spaces’ are not natural environments for humans. Spending time in such

spaces can have negative impact on productivity, learning, recuperation, enjoyment and well-being.
