PRODUCT DESCRIPTION

The Serati chair is an elegant and functional synchro-mech ergonomic chair, super comfortable for office use, also suitable as a hard-working intensive use chair. With two distinct models; the Serati Pro-control where everything is adjustable, or for simplicity choose the Serati Body-weight version,

you simply sit in it and get on with your day

You really need to sit in one

Superlatives are very much in our minds as we talk about the Serati chair. A functional, elegant chair that crosses typical boundaries; is it a superbly adjustable ergonomic chair, or is it a super comfortable executive chair, or is it a hard-working intensive use chair?

We can't describe Serati for just one of these roles, it excels at them all.

We back it up with our 10-year guarantee (2 years for 24/7)

Quite simply this is a very good chair, you really need to sit in one
