

THERAPY PEANUT BALL

SKU: N/A

GALLERY IMAGES

PRODUCT DESCRIPTION

The Peanut Ball can help to build all types of strength, flexibility and balance.

The peanut shape means this ball can only move in two directions on the one plane, such as forward and backward but not side to side. This provides greater stability than a round ball and are great for kids who struggle with:

- Balance (vestibular input)
- Developmental delays
- Gross motor skills
- Low muscle tone
- Sensory seeking behaviours

Features:

- Ridged surface provides extra grip making it suitable for a wide range of uses including rolling games
- Phthalate and BPA free
- Anti-burst rated to 300kgs

Size:

- 80 cm long in total and 40cm diameter of ball ends. Size shifts during use.
