Wriggle Cushion

SENSORY RESOURCES

DESCRIPTION

A sleek, space-saving alternative to a fit ball, this inflatable tactile wobble cushion is a great tool for children who find it difficult to sit still.

It's spiky on one side and flat on the other, kids can choose the type of tactile input that is right for them. This cushion provides active seating or balance training combined with the tactile input that many children crave.

CLASSROOM USE

- Aids with concentration, focus and muscle use, providing proprioceptive feedback and tactile stimulation.
- Not suitable for children under 3 years.

PRODUCT SPECIFICATIONS

Category	Flexible Furniture
SKU	ERWC

PRODUCT DESCRIPTION

Head, shoulders, knees and toes, knees and toes - our body is connected to our mind as we know. So for young and for old that like to wriggle and wobble, give them a cushion that will keep them out of trouble.

Like a sleek and space-saving alternative to a fit ball, this inflatable tactile wobble cushion is a great tool for children who find it difficult to sit still. When only slightly inflated the cushions create a slight

instability in the sitting position and create an active or dynamic sitting surface on any standard chair - allowing children to wiggle and fidget without the need for bulky or expensive equipment.

Aiding concentration, muscle use and providing proprioceptive feedback and tactile stimulation.

38cm cushion comes with a hand pump and is available in green only.

WARNING: Contains small parts not suitable for children under 3 years. Always use under adult supervision.
